What difference could such a thing make?

“The bottom line,” Werner Herzog has said “is the poet must not avert his eyes – you have to take a bold look about your environment – about what it is around you – even the ugly things, even the decadent things...You can look at the New York telephone directory and think you have all the information on those people that you need, but I want to know what do they dream? Do they cry into their pillow at night?” (Herzog 2011)

Nishida's fold

Robert Clarke states in his paper for Outside:

In his account of pure experience, Nishida refers to the double fold of the outside and the inside of consciousness in which experience is akin to two sides of a single piece of fabric. One side of the fabric is consciousness of the self, and the other is consciousness of the world; but world and self are of one and same piece of cloth, wholly interdependent and woven from the same threads. Therefore, pure experience is synonymous with direct experience. When one directly experiences one's conscious state, no subject or object yet exists, and knowledge and its object are completely integrated. This is the purest form of experience (Nishida, 1960).
